Profile

Results-oriented Senior Engineering Manager with over a decade of experience in driving innovation, strategy, and performance improvements in large-scale distributed and server-less applications, seeking to leverage proven leadership and strategy skills to grow product and revenue by using innovative data driven technology mindset. Adept at shaping the strategic direction of cross-functional domains and delivering tangible results that enhance product quality, increase revenue, and reduce costs.

A proven track record of bringing software products to fruition, raising revenue and cutting costs for Customers across North America, UK and Europe, APAC and US. Boosted earnings up to 20% by helping organizations adopt Deliverable based contracts. Delivered dozens of software products at avg. 10% under budget and timeline. Saved up to $50,000 by introducing XP practices.

Management Skills

- Leadership
- Product Management
- Product Innovation User Research
- Business Analysis
- Solution Architecture
- Decision Making
- Driving Product Strategies
- Designing Product Marketing Strategies
- Developing Value Propositions
- Data Driven
- Developing Value Propositions
- Creative & Critical Thinking
- Project Management Agile
- Metrics & Reporting Product Research
- Realistic Product Roadmaps
- Competitive Analysis Sales Planning
- Financial Planning
- Customer Success
- Team Management

Employment History

Senior Engineering Manager, Delivery Hero, Berlin
DECEMBER 2021 — PRESENT

- Defining the strategic direction of the domain targeting at least an 18-month time horizon that handles the second step of the funnel, browsing and listing experience, and contributing to the technical strategy for the entire Foodpanda, Foodora, Netpincer, and Dáme jídlo consumer products.
- Guiding and coaching an exceptional team of engineering managers, mentoring them in technical, leadership and people management aspects, including leading them to build stable, scalable, and reliable features and services.
- Together with my product counterpart, I am responsible for developing the domain vision and mission, translating tribe goals into domain goals.

- Establishing and growing best Engineering Practices with the team (e.g. TDD, CI/CD, Hybrid Agile Methodologies, etc.) in order to improve the engagement of your teams, the speed of delivery, and the quality of the features and services owned.
- Ensuring that all engineering practices are documented, lived, and regularly reviewed.
- Handling the strategies for architecture reviews, Employee satisfaction survey results and making sure organization remains profitable with CapEx
- Actively analyze, visualize and improve your domain's performance using standard delivery metrics with visibility and continuous improvement of technical KPIs and give guidance to my squads
- Led Cross-team initiatives with stakeholder expectations and dependencies, do continuous prioritization, alignment, and cost management.
- Play an active role in evolving our overall architecture, especially for systems and products owned by the teams ensuring quality, performance, monitoring, alerting and security using best practices.
- Contribute to scaling different processes of the organization, such as engineering hiring and on-boarding.
- Spearheaded "Creative Lab" R&D program to unleash creativity without bureaucracy.
- Led domain wide initiatives by managing task forces such as cost optimization, technical and C4 architecture documentations, iOS & Android App performance.
- Analyzing and improving teams' productivity based on OKRs & KPIs.
- Driving best practices in reliability management (resiliency, auto scaling, monitoring, alerting, stability, performance).
- Deep understanding of service-oriented and micro services architectural patterns, troubleshooting methods and best practices.
- Pragmatism, enabling a culture focused on delivering solutions.

Team Lead, Taboola, Bangkok, Thailand
NOVEMBER 2018 — NOVEMBER 2021

- Managed Taboola mobile products Line up.
- Managed Taboola Android SDK, iOS SDK, Recommendations API, MRAID, React-Native and Flutter plugin.
- Led the idealization, technical development, and launch of innovative products.
- Played active role in product innovation.
- Product Road map planning and execution.
- Product Release Management.
- Defined and implemented new processes across the APAC team.
- Developed solutions and customization along with the implementation team.
- Worked to support the company mission and adhered to company protocol at all times.

Team Lead - Full Stack, Simform Solutions, Ahmedabad, India
OCTOBER 2017 — NOVEMBER 2018

- Expanded team from 0 headcount to 28 full stack developers who are working in React, Vue, Angular, Node.JS, Python and React Native.
- Designed Project architecture and help team to design on themselves.
- Motivated team to learn, build and grow and brought a few developers out of their comfort zones to achieve more.

- Reduced the project delivery time by 12% over the year by defining and applying the best practices.
- Developed 24 small projects & modules with in the team which can be used as PnP in any project.
- Handled 8 Projects simultaneously at one point of time and delivered all of them on time.
- Made sure that I code at least 4 hours and hence inspired team members to write and design code base.

Team Lead - Full Stack, Moveo Apps, Ahmedabad, India
MAY 2016 — OCTOBER 2017

- Handled Full stack Development team of 20 engineers working on Mobile Apps, Hybrid Apps and Web application using React Native, iOS, Android, Node.JS, React, Angular and Python.
- Designed Architectures for 35 Applications and delivered them successfully.
- Brought a unique blend of leadership and management skills applied in a technical context with a team of developers.
- Steered a team towards a common technical vision, Contributed to scaling different processes of the organization, such as engineering hiring and on-boarding while writing code at least 30% of the time.
- Setup entire CI/CD pipeline using Jenkins, which is still being used across web and mobile projects.

Product Manager, Creanara, Ahmedabad, India
OCTOBER 2014 — APRIL 2016

- Guided the success of a product and leading the cross-functional team that is responsible for improving it.
- Worked with Cross functional Team in Business and technical to decide why, when and what of the products.
- Took part in product innovation from deciding strategy, deriving idea and maintaining and implementing features.
- Automated Alpha, Beta and GA releases for products and features using various channels after automated test processes using CI/CD.

Software Engineer, Insapient Info, Ahmedabad, India
JULY 2011 — OCTOBER 2014

- Developed software applications using mobile and web technologies, wrote test cases, implemented CI/CD.
- Planned and deliver features, used to write average 3400 lines of code daily.

Education

Bachelor in Computer Science, Gujarat Technological University, India, Ahmedabad, India

- 8.2/10 GPA
- Worked Part time and assisted some of the small scale teams to develop web applications
- Completed final year project in Image processing field
- Was leading the IEEE Regional Team
